

# Kevin Alejandro Reyes Velásquez.

Web Developer.

JavaScript / TypeScript · React · Node.js · SQL / NoSQL.

## About me.

**With over one year of experience in Front-end and Back-end development using JavaScript and TypeScript.** I am passionate about programming and building high-performance, visually appealing web applications that deliver an excellent user experience.

As a software developer, I aim to join a company with a strong organizational culture where I can contribute my knowledge and commitment, collaborating on challenging projects that allow me to continue growing both technically and personally.

## Work Experience.

### **Freelance Web Developer, Carazo.**

*June 2024 – Present.*

As a freelance developer, I have collaborated with various clients to create websites and web applications focused on increasing their business visibility and improving internal efficiency through the automation of tasks such as appointment, client, and staff management.

Responsabilities:

- Direct communication with clients to identify and meet their needs.
- Definition of functional requirements and technical constraints.
- Development of responsive and optimized user interfaces.
- Design and implementation of relational and non-relational databases.
- Development and integration of REST APIs.
- Testing and debugging of Front-end and Back-end applications.
- Deployment and maintenance of production environments.

Technologies:

HTML5, CSS3, Tailwindcss, JavaScript, TypeScript, React, Node.js, Express.js, MySQL, Sequelize, Jest.

### **IT Assistant at SAGSA, Carazo.**

*September 2022 – June 2024.*

SAGSA is a company specialized in the production of apparel, committed to innovation and continuous improvement. It manufactures over 60,000 units monthly, exported to various countries worldwide, where efficient time management in its processes is crucial.

During my time at the company, I was part of the Information Technology Department, where I collaborated in technical support, software and hardware installation and maintenance, and the development of internal tools aimed at optimizing departmental processes.
